SUMMARY

Seasoned Software Engineer with 4 years of experience in backend development, specializing in Java, REST APIs and enterprise application customization. Experienced in designing secure, scalable systems, optimizing database performance and delivering solutions for life sciences clients. Currently pursuing M.Tech in Software Engineering (Full Stack Development) and actively building full-stack applications using React, Node.js, and MongoDB.

EDUCATION

Master of Technology in Software Engineering (Full Stack Development) , BITS Pilani WILP	2024 – Present
Current Aggregate of 8.31 CGPA	
Bachelor of Engineering in Information Science (ISE) , Visvesvaraya Technological University	2017 – 2021
Secured an aggregate of 8.44 CGPA	

SKILLS

Programming: Java, JavaScript, Python

Web Technologies: HTML, CSS, REST APIs

Frameworks: React, Express, Node.js

Database: SQL, MongoDB

Cloud: AWS

Platforms/Tools: Veeva, GitHub, Jenkins, Postman, Jira, qTest, Microsoft Excel, ServiceNow

Soft Skills: Leadership, Mentoring, Teamwork, Presentation, Critical Thinking

Industry: Life Sciences, Salesforce

EXPERIENCE

Application Development Analyst	Oct 2021 – Present
<i>Accenture</i>	<i>Bangalore, India</i>
- Developed, enhanced, and maintained REST APIs and backend logic; optimized SQL queries, resulting in a 30% reduction in response time and enhanced user experience for a major pharmaceutical and life sciences client. - Designed and configured Vault Clinical and Vault RIM modules, enhancing application features based on business requirements. - Developed custom Vault Java SDKs using Java to automate workflows and extend document lifecycle functionalities, aligning with evolving business needs. - Implemented the end-to-end security model by creating Permission Sets, Security Profiles, Groups, DAC, and Application Roles to meet release requirements. - Involved in unit and Functional testing using qTest to validate functionality and performance and troubleshooting cross-layer issues from UI to DB. - Collaborated closely with business partners and operated within an Agile Scrum methodology, ensuring consistent and up-to-date documentation on Jira and Confluence.	

PROJECTS

School Vaccination Portal – Full Stack Web Application

- Developed a full-stack application using React, Node.js, Express, and MongoDB to manage Student Vaccination records and Drives.
- Implemented User Authentication, Dynamic Dashboards, Student Management, and Vaccination Drive modules.
- Created and integrated REST APIs ensuring smooth communication between frontend and backend.
- Implemented role-based access and protected routes using JWT authentication.
- Tech Stack: React, Node.js, Express, MongoDB, Postman.

Design and Implementation of Eye Pupil Movement-Based PIN Authentication System

- Implemented a gaze-based PIN authentication system using a smart camera equipped with real-time eye detection and tracking capabilities.
- Single-handedly developed Front-End of the application and built a real-time AI based model using LabVIEW.
- Received 'Best Project' award for its various real-life applications.
- Tech Stack: Java Servlets, Eclipse.

Covid-19 Tweet Sentiment Analysis using Deep Learning & LSTMs

- Implemented a Sentiment Analysis Machine Learning model using Deep Learning method and LSTMs network from scratch to determine whether a sentence is positive/negative.
- Developed an Emotion Detection model to identify the emotions such as sad, happy, angry etc. using BERT pre-trained model with 95% accuracy.
- Tech Stack: Python, Kaggle

COURSES & TRAINING

- | | |
|--|----------|
| • AWS Solutions Architect Associate – Learning Path (A Cloud Guru) | Jan 2025 |
| • Advanced Machine Learning, Coursera | Jun 2020 |

ACHIEVEMENTS

- | | |
|---|-----------|
| • Recognized by Project Lead for consistently delivering high-quality software solutions, Accenture | July 2024 |
| • Awarded Best Project and Best Student for outstanding final year project demonstration, RNSIT | Aug 2021 |
